EDA Project Numbering

The EDA Project Numbering system incorporates four main identifiers in each project number. These are: (1) A Regional Office designation; (2) identification of the program or program tool; (3) a sequential number; and (4) a resubmission code used to distinquish an add-on, an overrun and/or additional program or program tool distinctions.

The EDA project number may be either a nine or an eleven character identifier depending upon whether or not a resubmission code is used. The breakdown of the number follows:

Regional Office (1 & 2)	XX	XX	XXXXX	XX
Programs (3 & 4)				
Sequential Number (5-9)				
Resubmission Code (10 & 11)				

REGIONAL OFFICES (Characters 1 and 2)
